

AEROSPACE AND DEFENSE

Florida Seal & Rubber LLC offers Aviation, Military, Space, Power, and Unmanned System sealing solutions for aggressive chemical resistance, large temperature ranges, pressure variances, dynamic, static, rotary applications, and other environmental qualities.

Products and Services

Gask-O-Seals

Elastomer molded in grooves of a metal or plastic retainer for extreme reliability, longevity and durability.

Integral Seals

Thin metal or plastic retainer plates bonded to elastomer sealing for a complex sealing geometry, ease of assembly and reliability.

Dynamic Metal Seals

Extreme environment sealing optimal for high pressure and high temperature (HPHT) service.

PTFE FlexiLip and FlexiCase Rotary Seals

Designed for rotary applications and providing chemical compatibility, wide temperature variance and high speed capability.

Custom Molded or Machined Shapes

Unique in design/dimension to provide tighter tolerances, simpler designs, reduced install time and meeting technical safety specifications.

RFID and PTS (Parker Tracking System)

Radio Frequency Identification system to detect and identify seal properties to provide exact replacements, documentation, and installation assistance.
